

Kelly Moyes, The Zoological Society of London

THANK YOU so much for your help in providing us with GPS collars for our [Badger-Cattle Contact Project](#). From our initial enquiry, Telemetry Solutions has provided outstanding customer service but Telemetry Solutions went to great lengths to ensure we received a product that would work for our project. Despite having a very short deadline, the collars were received on time and we've now deployed nearly all of the collars supplied. The set up was very straight-forward given the manual provided and the tutorial over the telephone and we were extremely excited when we used the [auto download system](#) for the first time the other day and now have data! The [Smart GPS system](#) is very important to our project and that also appears to be working which is fantastic!! Thank you all so much for your help, we'll be contacting you very shortly to discuss ordering our next batch of collars. – [Quantum 4000E Medium Collar on Badger](#).
